

OFFICE MEMORANDUM

DATE: June 20, 1997

TO: District Engineers
TSC Managers
District Field Engineers
District Construction Engineers
Resident/Project Engineers
District Materials Supervisors/Engineers

FROM: Paul F. Miller C. Thomas Maki
Engineer of Construction Deputy Director
Construction Division Bureau of Highway Operation

Calvin Roberts
Engineer of Materials and Technology
Materials and Technology Division

SUBJECT: Joint Construction and Materials and Technology Instructional Memorandum 1997-
H
Line of Authority in Regions

While we are in transition from Districts to Regions, we want to maintain a line of authority and responsibility as presently covered by Michigan Department of Transportation (MDOT) policies. This joint CIM, effective immediately, shall define the line of authority in the Regions.

When applicable in MDOT policies and procedures, substitute:

- Regional Engineer for District Engineer
- Associate Regional Delivery Engineer for District Field Engineer
- Transportation Service Center (TSC) Delivery Engineer for Resident Engineer

For example:

The authorization limits on recommendations for a TSC Delivery Engineer would be the same as a Resident Engineer. The limit for the Associate Regional Delivery Engineer would be the same as a District Field Engineer.

If there are any questions, please contact your Regional/District Engineer or the Division Administrator.

Deputy Director

Engineer of Construction

Engineer of Materials and Technology
